

We offer body piercing-related services other than piercing at the following rates. All services are performed with sterilized tools in an environment of total hygienic control.

In order to provide a safe and clean environment for our clients, the necessary tools and equipment are washed in a 10-step process, sterilized in an autoclave, and stored in germicidal UV lamp lockers. Single-use disposables, like needles, gloves, and cotton swabs, are never reused, always properly disposed of, and issued brand-new for each client.

A hygiene fee in exchange for our services is required to prevent infections and to protect our clients' bodies.
