

Piercing procedures at studio TRUTH incur a procedure cost that supports the use of safe tools and hygiene. In order to provide a safe and clean environment for our clients, the necessary tools and equipment are washed in a 10-step process, sterilized in an autoclave, and stored in germicidal UV lamp lockers. Single-use disposables, like needles, gloves, and cotton swabs, are never reused, always properly disposed of, and issued brand-new for each client.

A hygiene fee in exchange for our services is required to prevent infections and to protect our clients' bodies.
